

Clive Fletcher
Ozonewash

Dear Clive,

I would hereby like to forward to you our letter of gratitude and appreciation for your professional and dedicated support in the introduction and training of the Ozone process for the dish washing machine.

Your technical expertise and knowledge did help us quickly to establish and maintain for the last 5 month a zero bacteria count that has been independently verified by another 3 chemical analysis performed every month.

The ozone process did undergo a very critical process review in order to maintain the ISO 9001 certification and has passed all doubtful concerns from the various interest groups.

Those results are achieved on a very high utilisation of more than 1000 guests per lunch period.

The cost of chemical compares favourably to other dish washing chemical products.

The energy saving is without any doubt a very helpful side effect.

We look forward to receive the Ozone chemical approval certificate by SABS in the next few weeks.

We wish you great success in the introduction of ozone process and can only recommend it to any user.

Kind regards

Volkmar Furweger
